Kenneth Doughty

Contact Tel #
405-542-3262

Fax #
405-542-3261

E-mail Address
Ken1tel@hintonet.net

Section 2

Local Area 911 Implementation

List all individual local areas covered by this report (e.g., Lee County, Virginia):

Blaine County, OK
Caddo County, OK
Canadian County, OK
Custer County, OK
Washita County, OK

(a) For each area listed above, identify the emergency response point to which 911 calls will be routed.

At this time each of the towns we serve have their specific numbers they list for emergencies. There is a number for the police, another for fire and another for ambulance. No Statewide answering point exists. The Governor's office has been notified that no local response point has been identified. We are waiting for the designation of a statewide or local response point from the Governor's office. The Oklahoma Telephone Association is working with the Governor's office to designate an entity for each county but none have been identified yet.

(b) For each area listed above, provide details of the carrier's progress in completing translation and other work necessary to route 911 calls to the identified emergency response point.

Our central office switch is capable of delivering 911 to a designated point. When we determine where to send the call we will be able to do the necessary programming.

(c) For each area listed above, provide the date or projected date that transition to the 911 abbreviated dialing code will be completed. We will be able to predict a date when we identify where to send the call.

Section 3

911 Implementation Problems

(a) Describe any problems the reporting carrier has encountered in identifying 911 number call routing points. Describe any other operational problems carrier has experienced during the initial transition stages.

I expect some disagreement from the different fire, police and ambulance services as to where they would like the 911 calls sent

(b) Where the reporting carrier has experienced 911 implementation problems, describe any efforts the carrier has made to coordinate with public safety agencies and state and local authorities.

At this time the Oklahoma Telephone association is working with the Governor's office to identify statewide or local answering points.

Section 4

Certification - To be signed by an authorized representative of the reporting entity

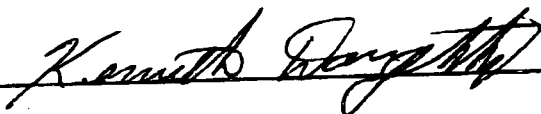

I certify that I am an authorized representative of the above-named reporting entity, that I have examined the foregoing report and to the best of my knowledge, information and belief, all statements of fact contained in this form are true and accurate statements of the affairs of the above-named company.

I certify that I am an authorized representative of the above-named reporting entity, that I have examined the foregoing report and to the best of my knowledge, information and belief, all statements of fact contained in this form are true and that the reporting entity has completed the steps necessary to properly route 911 emergency calls in the localities covered by the report as of _____.
